

MetaCase - Company Profile

MetaCase is the leading provider of Domain-Specific Modeling (DSM) environments. Since 1991, MetaCase has been enabling its customers to improve their productivity and competitiveness with modeling languages and generators designed to meet their needs. The company's flagship product, MetaEdit+®, is providing thousands of developers worldwide with a more productive, higher quality approach to system and software development.

Products

MetaEdit+ product suite is a set of powerful software development automation tools that allow users to create and implement modeling languages and automatic code generators custom-tailored to their particular needs.

In addition to its primary software products, MetaCase also offers a full range of training and consulting services to assist clients in maximizing the benefits of Domain-Specific Modeling.
